

# St Matthew's Preschool Policy

## 3.2 Administering medicines

### Policy statement

While it is not our policy to care for sick children, who should be at home until they are well enough to return to the setting, we will agree to administer medication as part of maintaining their health and well-being or when they are recovering from an illness.

In many cases, it is possible for children's GP's to prescribe medicine that can be taken at home in the morning and evening. As far as possible, administering medicines will only be done where it would be detrimental to the child's health if not given in the setting. If a child has not had a medication before, it is advised that the parent keeps the child at home for the first 48 hours to ensure no adverse effect as well as to give time for the medication to take effect.

These procedures are written in line with current guidance in *Managing Medicines in Schools and Early Years Settings*; the manager is responsible for ensuring all staff understand and follow these procedures.

The manager or the child's key person, is responsible for the correct administration of medication to children. This includes ensuring that parent consent forms have been completed, that medicines are stored correctly and that records are kept according to procedures.

### Procedures

- Children taking prescribed medication must be well enough to attend the setting.
- Only medication prescribed by a doctor (or other medically qualified person) is administered. It must be in-date and prescribed for the current condition.
- Children's prescribed medicines are stored in their original containers, are clearly labelled and are inaccessible to the children.
- Parents give prior written permission for the administration of medication. The staff receiving the medication must ask the parent to sign a consent form stating the following information. No medication may be given without these details being provided:
  - full name of child and date of birth;
  - name of medication and strength;
  - who prescribed it;
  - dosage to be given in the setting;
  - how the medication should be stored and expiry date;
  - any possible side effects that may be expected should be noted; and
  - signature, printed name of parent and date.

- The administration is recorded accurately each time it is given and is signed by the manager and or key Person . Parents sign the record book to acknowledge the administration of a medicine. Information recorded includes;
  - name of child;
  - date and time of dose;
  - name of medication
  - dose given
  - signed and witnessed by
  - verified by parent signature at the end of the day.

### *Storage of medicines*

- All medication is stored safely in a locked cupboard. We are unable to store medicines which require refrigeration as we do not have sole access to a fridge and so cannot guarantee that they will not be tampered with. Should a child require such medication then arrangements will be made with the parent. Parents are responsible for ensuring medicine is collected at the end of the day to the parent.
- For some conditions, medication may be kept in the setting. Key persons check that any medication held to administer, is in date and returns any out-of-date medication back to the parent.
- If the administration of prescribed medication requires medical knowledge, individual training is provided by a health professional. We would require the child's parents to arrange this training for staff before the child attended the setting.
- No child may self-administer, unless we have been advised otherwise by the child's parents. Where children are capable of understanding when they need medication, for example with asthma, they should be encouraged to tell their key person or other staff what they need. However, this does not replace staff vigilance in knowing and responding when a child requires medication.

### *Children who have long term medical conditions and who may require on ongoing medication*

- A risk assessment is carried out for each child with a long term medical condition that requires on going medication. This is the responsibility of the deputy manager Mrs Amanda Rees alongside the child's key person. Other medical or social care personnel may need to be involved in the risk assessment.
- Parents will also contribute to a risk assessment. They should be shown around the setting, understand the routines and activities and point out anything which they think may be a risk factor for their child.
- For some medical conditions key staff will need to have training in a basic understanding of the condition as well as how the medication is to be administered correctly. The training needs for staff is part of the risk assessment, and should be arranged by the parents.
- The risk assessment includes vigorous activities and any other activity that may give cause for concern regarding an individual child's health needs.
- The risk assessment includes arrangements for taking medicines on outings and the child's GP's advice is sought if necessary where there are concerns.
- A health care plan for the child is drawn up with the parent; outlining the key person's role and what information must be shared with other staff who care for the child.

- The health care plan should include the measures to be taken in an emergency.
- The health care plan is reviewed as necessary. This includes reviewing the medication, e.g. changes to the medication or the dosage, any side effects noted etc.
- Parents receive a copy of the health care plan and each contributor, including the parent, signs it.

*Managing medicines on trips and outings*

- If children are going on outings, staff accompanying the children must include a staff member who is fully informed about the child's needs and/or medication.
- Medication for a child is taken in a sealed plastic box clearly labelled with the child's name and name of the medication. Inside the box is a copy of the consent form and a card to record when it has been given, with the details as given above. Unless the accident book is taken on the outing when it will be completed as usual.
- On returning to the setting the card is stapled to the accident/incident record book and the parent signs it.
- If a child on medication has to be taken to hospital, the child's medication is taken in a sealed plastic box clearly labelled with the child's name and name of the medication. Inside the box is a copy of the consent form signed by the parent.
- This procedure is read alongside the outings procedure.

This policy was adopted at a meeting of
